Fund Update

Australasian Managed Fund

For the quarter ended
30 September 2026

This fund update was first made publicly available on 29 October 2026.

What is the purpose of this update?

This document tells you how the Australasian Managed Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Generate Investment Management Ltd prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Australasian Managed Fund aims to provide a higher return over the long term. It invests in an actively managed portfolio of growth assets located predominantly in New Zealand and Australia with a very minor allocation of income assets. Volatility is likely to be high. Returns will vary and may be low or negative at times.

Australasian Managed Fund	
Total value of the fund	$6,962,291
The date the fund started	03 July 2023

What are the risks of investing?

Risk indicator for the Australasian Managed Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-kickstarter. Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the last five years.[1] While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

Fund Update: Australasian Managed Fund

30 September 2026

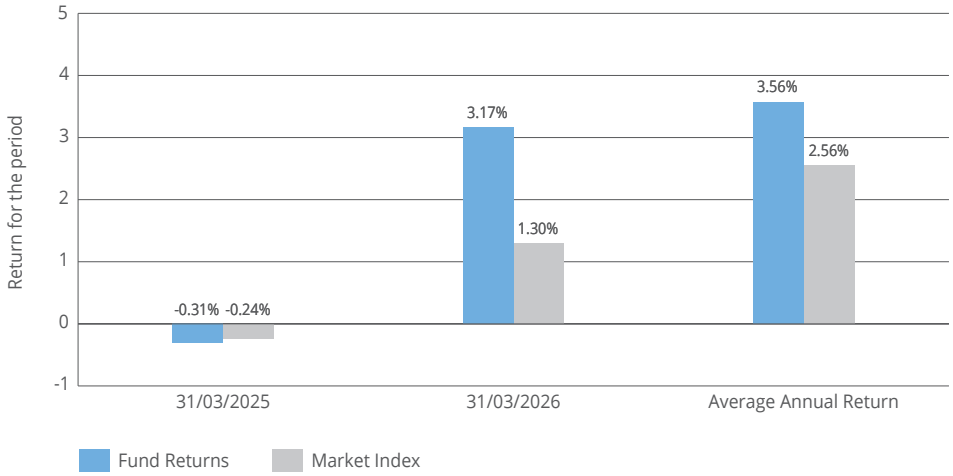

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	-1.41%
Annual return (after deductions for charges but before tax)	-1.41%
Market index annual return (reflects no deduction for charges and tax)	-0.18%

The market index return reflects a composite of benchmark index returns, weighted for the fund's target asset allocation, being the fund's relevant benchmark since inception. All of the share market benchmark indices used include dividends but do not include imputation credits.

Additional information about the market index is available in the SIPO on the register at disclose-register.companiesoffice.govt.nz.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2026.

Important: This does not tell you how the fund will perform in the future. Returns in this graph are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. Benchmark returns in the graph are before the deduction of tax.

What fees are investors charged?

Investors in the Australasian Managed Fund are charged fund charges. In the year to 31 March 2026 these were:

	% of net asset value
Total fund charges	1.10%
Which are made up of:	
Total management and administration charges including:	
Manager's basic fee	1.07%
Other management and administration charges [2]	0.03%
Total performance based fees	0.00%

A portion of the 'other management and administration charges' relate to management, performance and administration charges from investments in underlying funds. These calculations are based on estimates.

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for more information about fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

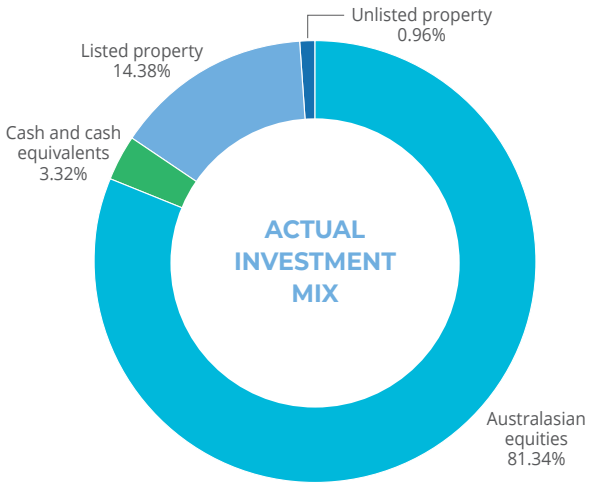

Hannah had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Hannah incurred a loss after fund charges were deducted of -$141 (that is -1.41% of her initial $10,000).

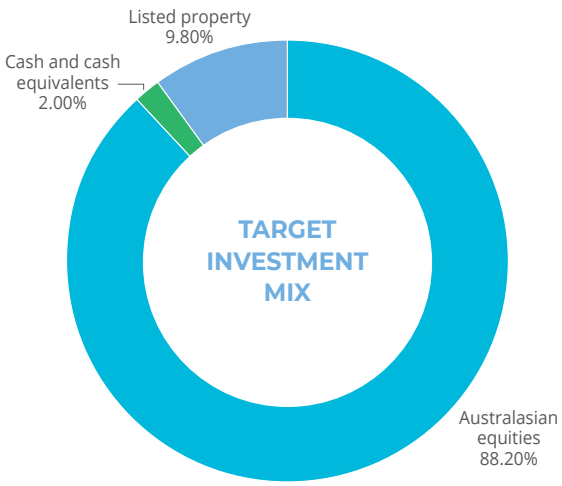

Fund Update: Australasian Managed Fund

Notes

1. As the fund has not been in existence for 5 years a combination of market index returns and the fund's actual returns has been used to complete the risk indicator. Actual returns have been used from 21 July 2023 to the end of the period to which this fund update relates. For all relevant periods prior to 21 July 2023 market index returns have been used in order to construct a total of 5 years of returns on which to base the risk indicator. As a result of estimated returns partially being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. This fund invests in underlying funds managed by third party managers. The fees on these funds are taken from offer documents or estimated using data from their most recent financial statements. Where applicable, performance fees on underlying funds are estimated taking into account highwater marks.
3. 'Cash and cash equivalents' includes the value of foreign exchange hedging derivatives related to the fund's off-shore investments, on call deposits and short term (less than 12 months) fixed interest investments.
4. The fund has the ability to invest in unlisted property and infrastructure investments as per limits set in the SIPO.
5. Australasian equities include an investment in unlisted New Zealand equities.
